The Raymond Pharmacy
P. W. Copé

Alma Hancock returned last week from a two years mission spent in Eastern Canada.

Magrath is growing rapidly. From Saturday evening until Tuesday morning, last week, eight babies were born.

BORN—To Mrs. and Mrs. Geo. D. O'Brien, a son.

BORN—To Dr. and Mrs. D. B. Fowler, at Magrath, a son.

The marriage of Miss Ada Nilsson to Mr. J. Ford took place at Milk River last Saturday. They will reside at Raymond where the groom works as a mechanic at the Graham garage. Their many friends wish them every success.

Mr. Walscott has been busy lately hauling his grain to the elevator, using a big White truck for this purpose. He is a great enthusiast for the truck method of transportation over the horses and tank method.

News Notes

Mrs. K. L. Paxman, mother to Mrs. C. F. Tollestrup, returned home from Utah Saturday morning. She spent the last month in Missoula, Montana.

A party of between ten and fifteen immigrants from Central Europe arrived in the city yesterday, most of them leaving for the Raymond district where they will find employment in the beet fields. These Europeans have not been brought out under any colonization scheme but through the efforts of their friends who are already settlers in Southern Alberta.—Lethbridge Herald.

Mr. and Mrs. Heal left last Saturday for Lethbridge, where Mr. Heal has employment. He was on the factory staff here.

"The Versatiles" presented last Saturday by C. W. Stone and the Men's Glee Club was a signal success. The variety program went so well with the audience that many requests for a repeat performance have been heard. This tells its own story. Space prevents a complete review.

There was 55 votes cast at the election held last Friday for municipal councillor, of which F. T. Holt received 30 and Jas. H. Walker 25. A meeting of the new council will be held next Tuesday. Probably Mr. Holt will be appointed Reeve.

Next Tuesday the second ward M. Men will stage their play "A Bachelor's Honeymoon" in the Opera House. Those who like to laugh, and that, of course, includes everybody, will find this play one of the most entertaining ever presented here. Dick Scott, in the leading role, will be the hit of the evening. He has a part which suits him perfectly and he handles his lines in a way an audience will find irresistible. He, Lou King and Pete the Printer will do their utmost to keep everyone in a happy humor. And if you think this play lacks beauty—well, just take a glance at the names in the cast. The stage will require no other ornaments to complete the setting. In cases of this kind scenery is immaterial.

T. L. Halpin, local manager of the Standard Bank, returned on Friday last, after attending the annual meeting at the head office of the Bank in Toronto. There were 15 in the party from the west, all of whom thoroughly enjoyed themselves while traveling as well as in the east. On the evening of the annual meeting an elaborate banquet was held at the King Edward Hotel, which was attended by over 200 managers and the head office officials. On the following evening the Bank held its annual ball, to which all members of the staff in Toronto and visiting officials from distant points were invited. This was a formal affair which was attended by over 500 guests, and an enjoyable time was had by all. The western delegates were then allowed 3 or 4 days to visit with friends in old Ontario after which the party was reunited and returned west via Chicago, Minneapolis and Winnipeg.

The Standard Bank reports the best year in its history, with phenomenal gains in every department. The year 1928 is expected to show still bigger and better results.

TO NIGHT and SATURDAY

Every picture appeals to SOMEONE. But "THE WINNING of BARBARA WORTH" will appeal to EVERYONE! No one can escape the magic touch of this perfect picture. Every Man, Woman and Child in Raymond should see it.

RED ROSE TEA "is good tea"

Red Rose Orange Pekoe is
the best tea you can buy
In clean, bright Aluminum

The Water Powers Of Canada

In the "forward look" which is now almost universally characteristic of the Canadian people regarding their Dominion, and which offers such a sharp contrast to the less optimistic—in fact the rather pessimistic—view entertained a comparatively few short years ago, the subject of power, and power development schemes, looms very large, coupled with the question of improved and cheaper means of transportation which has always bulked largely in the national policies of the country.

The development of power through the generation and application of steam made the nineteenth century noteworthy, and introduced the age of machinery in the work of production as contrasted with the old methods of handwork and manual labor. The closing years of the last century saw the beginnings of the development of power through electrical energy, largely developed through the primary utilization of steam. The internal combustion gasoline and oil engines also had their beginning.

During the first quarter of the present century development of electrical energy, and of internal combustion engines, proceeded with amazing rapidity, particular attention being paid to the harnessing of water-powers throughout the world for the production of electrical energy in its cheapest form and in enormous quantities, until it is now recognized that those countries possessing ample water-powers, and those natural resources that are the basic requirements in manufactures, are, and will to an ever increasing extent be, the great industrial nations of the world.

In extent, variety, and wealth of natural resources required in manufactures, and in the magnitude of its available water-powers within reasonable distance of such resources, Canada is probably the richest country in the known world, and the development of its water-powers for use, and the consequent utilization of its natural resources, is going ahead by leaps and bounds. The value of these water-powers and resources are only beginning to be fully realized by the people as a whole, and what they may be made to mean in the future of the Dominion.

Men of wealth, captains of industry, financial magnates, are alive to the importance of these great sources of potential wealth. They realize they are the foundations upon which great enterprises and an abounding prosperity can be built. As a result a scramble, a struggle, for possession and control of water-powers is in progress, and it behooves the people of Canada to give close attention and deep study to the many issues involved.

Naturally two schools of thought have arisen as to the policy which should be followed in relation to possession, development and control of water-powers, one advocating retention by the Government, whether Federal or Provincial, and development and ownership by such authority as a matter of public policy; the other strongly urging private ownership, development and control. It is argued, probably with truth, that development will be more rapid through the investment of private capital than can possibly be expected if left solely to Governments. It is further argued that, through the retention of a large measure of Government control over operations and rates, the interests of the public and the country at large can be protected.

Advocates of complete Government ownership, on the other hand, contend that these water-powers are the property of and an asset to the whole country, and should not be alienated; that these water-powers will run on forever and not be dissipated or exhausted as other resources may be; that, even granting that development might be more rapid under private ownership and greater initiative shown through the investment of private capital, the Canadian people will be well advised to take the longer look into the future of their country and protect that future by retaining complete possession and direct control of these sources of industrial greatness and national wealth and prosperity.

Ontario is practically committed to the policy of public ownership; Quebec, on the other hand, has followed the policy of development through private investment. Manitoba has both public and private development schemes under way. Saskatchewan has a Power Commission studying the whole subject. Manitoba and Alberta are both striving to obtain control of certain water-powers, title to which now rests with the Federal authorities. And looming over all is the great issue of development and control of the huge powers along the St. Lawrence and Ottawa Rivers.

This whole subject is so vitally important to the future of Canada it is well that all citizens should give earnest and careful consideration to it, and not be stampeded by private interests or by political catch-cries into either approval or condemnation of any policy now presented until it has been most thoroughly examined and demonstrated to be sound and wise, or, on the other hand, inimical to the country's best interests.

Manitoba Old Age Pensions

Monies To Be Raised By Special Levy On Property

Monies for the payment of the old age pensions will be raised by a special levy on property in the province, based on the equalized assessment. Premier John Bracken told the Manitoba Legislature, when introducing the bill. One half of the total amount

necessary to finance the scheme will be paid by the Dominion Government, but the province will have to pay the other half, and in addition will have to bear the cost of administration, which will be placed in the hands of the Workmen's Compensation Board.

Advocates Film Censure

Member Of Ontario Legislature Wants Films Specially Censored For Children

Aurelian Belanger has given notice of his bill to amend the Theatres and Cinematographs Act, as indicated when he was addressing the Ontario legislature recently. It proposed appointment to the board of censors of a man whose duty it would be to revise films from the standpoint of their effect upon children. Approved films would be stamped to indicate that they may be exhibited to children under 16. Those not so approved would not be permitted to be shown to children, even when they are accompanied by parents or guardians.

Record In Miniature Writing

Writing in miniature on three-penny pieces is the hobby of a Harrow engraver. He has just completed engraving the Lord's Prayer twelve times on one of the small coins. And there is still room for three more versions! He thus beats the record of a Southampton man, who succeeded in writing the Lord's Prayer 11 and two-thirds times in a space the size of a three-penny piece.

Keep Minard's in the Medicine Chest.

Tribute To Sun Life President

Mr. T. B. Macaulay, president of the Sun Life Assurance Co., who recently celebrated his fiftieth year of continuous service.

Extraordinary Expansion Of Sun Life Assurance

Business Has Doubled On An Average Every Five Or Six Years

The extraordinary expansion of the Sun Life Assurance Company of Canada during the last few years has caused its annual report to be awaited with unusual interest, not only by the policyholders of the Company, but by a large section of the general public.

Perhaps a sentimental interest attached to this expectation this year, because the President, Mr. T. B. Macaulay, in October celebrated his fiftieth year of continuous service, and it was known that the worldwide organization of the Sun Life Company had determined to specially honor his jubilee with an outstanding tribute in the form of increased business.

Having in view the fact that the Company's business has doubled on an average every five or six years since it was organized, it would appear rather difficult to outdo previous records. But the annual report which the President has just submitted, and which appears in this issue, must have surpassed the expectations of the most sanguine. The total amount of assurances in force with the Company now approaches the billion and a half figure, \$1,487,000,000, an increase for the year of over \$231,500,000. The total net income for the year exceeded \$100,000,000—five times what it was ten years ago, and more than \$23,000,000 in excess of the income for the previous year.

The outstanding position of the Sun Life Company in the assurance world is not confined to Canada. Such statistics as are available for 1927 indicate that the aggregate new business of all the companies operating in North America last year barely exceeds the total new business of the previous year. The increase in the new business of the Sun Life of Canada, on the other hand, was twenty-three per cent. Assurances in force on the books of the Company have doubled in four years—new business has trebled in that period. This wonderful expansion has been paralleled by a great increase in the already proverbial strength and resources of the Company. The assets have been increased by over \$50,000,000, and now reach the impressive total of over \$400,000,000. The Company's assets approximate the amount of the total assurances in force only eight years ago.

Dread Of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are warded off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

Canadian Coal Industry

The number of men employed in the coal industry of Canada last year was 29,004, divided between 6,611 surface men and 22,393 underground. Nova Scotia mines employed 13,402 persons; Alberta, 9,469, and British Columbia, 4,903. Saskatchewan had 648 and New Brunswick, 582.

True love will conquer a great many obstacles, but poverty and the toothache are exceptions.

Nursing Record In Two Continents Hard To Equal

Nurse Waite of New Brighton writes: "While nursing in New York, in my early twenties, I was poisoned by food, my sister nurse recommended your wonderful Vegetable Laxative Pills. I am never without them and have prescribed them for thousands of my patients who were suffering with indigestion, gas and sour stomach, biliousness, sick headache and indigestion caused by constipation poisoning."

ORIGIN OF TERM "ORANGE PEKOE"

Thousands of people every day read of and ask for "Orange Pekoe" tea, yet rarely know what this term means. Mr. Spalding Black, of the Salada Tea Co., gives the following information on the subject:

"At one time China produced practically all the tea used in the world. There the tip leaves of the tea bush looked silvery in color and when cured were wiry in shape. These tip leaves were called by the Chinese 'Pak-ho' (meaning silver hair). In the latter part of the nineteenth century, when tea growing had spread extensively to Ceylon and India, tea growers discovered that the color of the tip leaves on the Ceylon and Indian tea bushes was changed by the climate to a slightly more orange shade, and the Ceylon and Indian tip leaves came to be called 'Orange Pak-ho.' This was soon Anglicized to the term we now have—'Orange Pekoe,' which should be pronounced 'Peek-o.'"

The ordinary buyer of tea, when asking for "Orange Pekoe" expects to receive a Ceylon or Indian Black Tea. However, there are so many qualities of "Orange Pekoe" offered to the public, and frequently at bargain prices, that a word of warning is necessary.

Everyone is familiar with the merchant who has perishable fruit and who sells for very low prices the last of the shipment which has lost its freshness, which the merchant wants to be rid of to avoid loss. The same thing applies to tea, which also is very perishable if exposed to the air. When you see cheap tea, it is either very poor quality or else it has lost its freshness and most of its strength, whether this tea is called "Orange Pekoe" or not.

In this age of well-edited newspapers, radios, automobiles and fast trains, accurate knowledge on a great host of subjects is transmitted rapidly. The advance of science has now, where been more valuable to mankind, except perhaps in preventive medicine, than in the means of protecting the purity and goodness of food stuffs.

Today, in accord with enlightened knowledge, the best tea is always sold in sealed air-tight packages, preserving it from deterioration in flavor and contamination from any outside source. Canadian tea-drinkers are today getting better and purer tea than ever before. The sales of well-blended and carefully packed package teas are constantly increasing as a result of the purity and superiority of these teas being advertised to the public."

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

Most Competent Air Pilot

Colonel Lindbergh Can Easily Qualify For This Title

At Havana Colonel Lindbergh completes his program of Latin American visits. Twelve independent nations, a British colony, two insular possessions of the United States and the Panama Canal Zone have been visited by him since December 13, when he rose from Bolling Field in Washington under weather conditions that to many seemed inauspicious, but which to his trained intelligence were propitious. Each trip was a pioneer voyage. Lindbergh's maps were necessarily makeshift affairs for he blazed the trail over uncharted wildernesses, seeing what no man ever saw before, solving problems never before faced. He sailed near sea level, at high altitudes, in weather fair and weather foul. He kept his schedule as a railway president might hope to have a train keep its schedule.

It is all very extraordinary in aviation as at present developed. It is also very fascinating. But above all it silences those inevitable ones who are inclined to say that every great feat, like the flight from New York to Paris, is "luck." The conviction is nearly universal that Colonel Charles A. Lindbergh, formerly of the United States Air Mail Service, is about the most competent pilot in the world.

One or two drops of tincture of iodine will vanquish germs in a quart of unsafe water within 20 to 30 minutes.

A Primo Dressing For Wounds. — In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

Will Shelton, chief of the Snohomish tribe of Indians, is carving his tribe's history on a huge cedar pole.

Swgrass, a tall grass that grows in marshy places in Florida, is used for making paper pulp.

Minard's Liniment—Invaluable in the Stable.

Scheme For Aerial Signs

Principal European Cities To See Signals Flashed From Air

Giant equipped aeroplanes and rigid airships of new designs are soon to be employed in organized schemes for flashing aerial night signs above the principal cities of Europe.

One project nearing completion is for a powerful multi-engine night-flying plane with a device underneath its widespread wing which will permit huge gleaming letters to be spelt out by an operator as the machine rushes through the darkness.

Another plan in active preparation is for a super-giant ingeniously equipped airship to be stationed permanently in a big shed at Friedrichshafen, and to set off on long distance flights during which it will appear suddenly in the night sky above one great city after another.

On either side of the monster's hull will be immensely long frames containing countless electric light bulbs of various colors. As the machine sails majestically above a densely populated area, electricians in a chamber within its keel will tap keys and cause great letters to flash out along the airship's sides, spelling words which will be seen by the thronging gaze up. Yet another plan being worked up is for a series of pilotless air machines of a perfect type, wirelessly controlled to be sent up on night flights.

These manless craft, emitting a luminous smoke stream, would go up and repeat automatically a series of prearranged evolutions which would form easily seen letters at great heights in the darkness.

Birds In Northern Canada

According to explorers of the Topographical Survey of the Department of the Interior, the predominant bird note of the Northern woodlands of Canada, in the latitude of Great Slave Lake, is that of the white-throated sparrow, while the plains to the North of this wooded area are always associated with the plaintive song of the Lapland Larks. This friendly little bird is always about camp and follows the traveller on his journey.

Muscular Rheumatism Subdued.

When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

Life's greatest illusion is that money brings contentment and felicity. Nothing of the kind. It brings responsibilities and worries.

When Pain Comes

What many people call indigestion is very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude medicines when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—nuy drugstore.

HERCULES

PERMANENT BUILDING PAPER

CUT IT—it doesn't tear easily

There's no denying that the most careful carpenter doesn't handle his tools with the dainty movements of a dentist.

Consequently he will appreciate a building paper which allows him to throw careful handling to the winds and work rapidly without fear of tearing. Hercules Permanent Building Paper is tough. Tearing or cracking in using is unheard of. Carpenters prefer it because it is easy to use.

Hercules—in three grades, x light, xx medium, and xxx heavy, is wind proof and damp proof.

Send now for samples and prices.

Appleford Paper Products

HAMILTON, CANADA

LESSON No. 17

Question: Why is emulsified cod-liver oil so efficient a food for young children?

Answer: Rickets or weak bones are evidences of lime-deficiency. Emulsified vitamin-rich cod-liver oil helps Nature supply this deficiency.

Pure, pleasantly flavored, nothing quite surpasses

SCOTT'S EMULSION

Canada Indebted To The Mother Country For Vast Sums Spent On Protection

No more formidable business confronts Canada than the preparation and completion of a proper cadastral survey of the Dominion on the lines of the famous Ordnance Survey of the Motherland. The extent of the undertaking can be gauged from the remark passed by President Cantley at the convention of National Surveyors in Toronto the other day, that a vast proportion of Canada remains to be explored and surveyed. Practically only one-quarter of the area of the country has been anything like properly mapped. Even where mapping is supposed to have been done, much of it is conjectural and depends more or less on disconnected journeys, traders' and trappers' reports, information obtained from natives, and the like. When the time taken to map the comparatively limited area of the British Isles is considered, some idea can be obtained of the magnitude of the job ahead of Canada, even with all the resources at command of modern discovery and invention. Nor should the wonderful resources that, in all probability, lie hidden in these unknown and unexplored regions be forgotten.

President Cantley's statement has suggested another train of thought to the Kingston Whig-Standard and prompts it to ask: How much do Canadians, or some of them, remember of the part that the Motherland had in obtaining this great Canada of ours? Do we lose sight of this in the prosperity of the present? We remember, the Kingston paper says, that some few years ago this question cropped up in the Dominion House, and one member went so far as to say, "I say this claim of our honorable friend opposite that we are greatly indebted to Great Britain is a fallacy which cannot be supported by fact. As a Canadian, I wish to say that in a material sense we are not indebted to Great Britain for anything, and in no sense is Canada indebted to her for more than goodwill and filial affection."

The next speaker, however, was better informed and said: "We have always had the protection of the greatest sea power on the earth. Between 1852 and 1902 Great Britain spent \$85,000,000 on military expenditure in this country. Go back 100 years and you will find that she spent \$170,000,000 in addition, making a total of \$255,000,000 in 150 years. Then she spent \$35,000,000 in the old and public works in the city of Quebec, and \$81,000,000 on our canals. Again she spent \$56,000,000 on all kinds of works in all parts of this country. And I want you to remember that I am not taking into consideration the war of 1775, or the public works on which enormous sums were spent in 1778, at Montreal, Toronto, Halifax, St. John, Kingston, St. Lewis and many other places, I am not taking into consideration the war of 1812, which lasted, so far as the British taxpayer is concerned, from 1811 to 1815, and I could go on as to what she expended on roads and bridges in this country. The expenditure of the Treasury of Great Britain on our railways and public works would reach over \$1,000,000,000. Therefore, when I hear the honorable member say that we do not owe Great Britain anything, I cannot understand how he can make such a statement, so utterly unfounded on facts."

Perhaps the Motherland is entitled to some little praise in "This Great Canada of Ours."

The widow's recovery from her grief sometimes depends upon the promptness of the life insurance company.

It isn't necessary to make a fool of yourself every time you have an opportunity.

The Lower One: "Don't shake so, or I will box your ears!"
The Upper One: "Come up and do it!"—Lustige Blätter, Berlin.

W. N. U. 1727

Turnips For Beef Cattle

More Suitable For Fattening Purposes Than Mangels

When roots are fed to beef cattle turnips should be used as, according to a new Dominion Experimental Farms bulletin on "Growing and Feeding Field Roots," they are more suitable for fattening purposes than mangels. The latter are better suited for milk production. Results of tests at different experimental stations show that turnips have a high value when fed to beef cattle, especially when no other succulent food, such as silage, is available. When pulped and mixed with cut or chaffed straw or poor quality hay they very much improve the palatability and quality of these coarse roughages. The bulletin, which gives a great deal of information on the cultivation of roots, may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Menace To War Aviators

Discovery Of Deadly Gas Announced By Danish Inventor

A Danish inventor named Arthur Christensen claims to have made a remarkable discovery, which he contends will have devastating effects on aviators in the next war. He has invented an anti-aircraft gun which he declares will hurl into the air masses of concentrated gas. Airmen who fly into this gas screen will, he says, be paralyzed in their machines.

The invention has been tested by experts and they state that the tests have proved satisfactory. The gun is able to throw the gas to a very great height.

1726

An Attractive New Frock

The charming frock pictured here is an unusually smart style. The front of the skirt dips at the lower edge and is shirred across the top and joined to a camisole body. The waist has a deep open front gathered at the lower end of the opening and finished with an ornament, and the sleeves are gathered into wristbands. No. 1726 is for ladies and misses, and is in sizes 16 years, 36, 38, 40, 42 and 44 inches bust. Size 38 requires 3 3/4 yards 36-inch, or 2 1/4 yards 54-inch material; 3/4 yard 27-inch contrasting, and 1 3/4 yards 27-inch lining. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical style, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

A heart full of grace is better than a head full of notions.

Recalls Haig's Visit To Jasper

Officially Opened Golf Course Two Years Ago

The news of Earl Haig's death, which was heard with sorrow throughout the British Empire, recalls to Canadians the visit the famous soldier paid to Canada two years ago. And this brings to mind the fact that it was Earl Haig who, on July 17, 1925, officially opened the Jasper Park golf course. Accompanied by Lady Haig, Brigadier-General J. A. Blair, Brigadier-General A. F. Home, Mr. Walter Pratt, General Manager, Canadian National Railways' Hotels, Mr. Stanley Thompson, the architect who laid out the course, and Col. Maynard Rogers, who was then superintendent of Jasper National Park, the Field Marshal inspected a group of mountain guides and park rangers and the crew manning the dining car of his train and then strolled on to the course and drove off the first ball.

The inspection, which took place on the road leading into Jasper Park Lodge, was unique in that most of the rangers and guides had ridden from 50 to 100 miles to meet the Field Marshal, and they were picturesque in the colorful frontier costumes. They were headed by Major Fred Brewster, M.C. The great soldier addressed the men, who were all veterans, and told them how he was much touched that they considered it worth while to ride so far to meet him. He was presented with a pair of buffalo-hair chaps, and Lady Haig received a beautiful pair of Indian worked buckskin gaiters.

Earl Haig, as might be expected, since he was at one time Captain of the Royal and Ancient Golf Club of St. Andrews, proved himself an exceptionally good player. His drives were long and always straight down the fairway and his work on the greens steady, with the result that he and Mr. Thompson, his partner, won, three up, against Brigadier-Generals Blair and Home. At the conclusion of the game, the Field Marshal expressed to Mr. Thompson his surprise at the manner in which the course had been hewed out of the mountainside and put in good shape in such a short time. He was delighted with the beauty of the mountain surroundings and he gave it as his opinion that the Jasper course would rank among the best in the world.

U.S. Embassy At Ottawa

Doubt Work On U.S. Legation Can Start In Less Than A Year

While negotiations practically have been concluded by the United States for the acquisition of a site for the legation offices in Ottawa, state department officials doubt whether actual work on the building could begin in less than a year.

The site, facing the Canadian government parliament buildings and adjoining the Rideau Club on Wellington street, is considered one of the best in the Canadian capital. While the price to be paid was not divulged, it is known to run into six figures for the approximately 6,000 square feet involved.

Grain exports from the port of Vancouver for the current crop year to the end of January total 33,109,133 bushels. For the same period last year 16,358,495 bushels were exported.

An acre has one hundred and sixty square rods.

Some New Varieties Of Apples

Good Results Obtained From Cross Breeding At Experimental Farm

The Division of Horticulture of the Dominion Experimental Farms Branch has for many years been carrying on breeding work with different kinds of fruit and each season sees some new varieties of special promise produced. So far as apples are concerned it is the object of the Division to originate new varieties, the seasons of use for which will cover the whole year, and which will at the same time possess all the characteristics necessary to ensure popularity. The latest report of the Division Horticulturist, distributed by the Publications Branch, Department of Agriculture, Ottawa, gives descriptions of some of the most recently originated varieties. Among the most promising of the new apples is Coxstone, a Stone seedling which bears no marked resemblance to its parent, except in flavor. It is yellow, splashed with orange red, the predominate color being orange red, and is a nice dessert apple of attractive appearance. Its season is probably from December to March. Another new apple is Forwood, a cross between McIntosh and Forest, with a season from December 1 to March. It is a good, late keeping, sweet apple, attractive in appearance and resembles Forest considerably in flavor and shape. Forwood, another McIntosh and Forest cross is a promising winter dessert apple of good quality and flavor. An interesting new variety which may be useful on the prairies, is Redman, a cross between Prince and McIntosh. It is large for a crab but below medium for an apple. It is, however, a handsome, dark crimson apple, resembling a deep colored McIntosh.

Food Shortage In Russia

Authorities Have To Take Vigorous Measures To Remedy The Situation

The shortage of flour, butter, eggs, soaps and textiles has reached such a serious stage in Russia that the authorities have decided to take vigorous measures to remedy the situation. This situation, recalling the days of famine, has been attributed primarily to the grain shortage. The resignation of Alexander Petrovitch Symonoff, commissar for agriculture, because of failure to manage the grain storage campaign which fell 2,000,000 tons short of the previous year despite increased harvest, was reported recently.

A slight improvement in the grain situation has been attributed partly to the recent visit of Joseph Stalin to Siberia, where he issued new instructions to the officials there in the hope of persuading the peasant farmers to send their grain to the markets.

British Comment On Budget

"When an Englishman reads the Canadian budget which provides for a reduction in taxation of nearly £4,000,000 including a ten per cent. cut in the income tax, he smiles, as no says, on the wrong side of his face," comments The Evening Standard. "Not that he grudges Canadians their good fortune, though he may perhaps envy their Finance Minister, but because he sees here a principle practiced in every country but his own. This principle is simply that public expenditure is to be kept within the strictest limits the country's needs allow."

Beautifying of Station Gardens

Enlaid under the white shroud of winter at its depth, the station grounds, right-of-way and surroundings of Canadian Pacific Railway lines give no promise at this time of year of the beauty of color, perfume and flower adornment that will feature them in a few months.

The horticultural department of the railroad, will during the next few weeks, distribute to its agents, section foremen and others for planting, several thousand seeds. At selected points special packets will be sent for growth under glass, thus producing an earlier display. Additions are to be made this spring as usual, to the stock of trees, shrubs and perennial plants which form the permanent basis of C.P.R. gardens.

In the territory north of Lake Superior, where a particularly hardy plant is desirable, the bulk of the display will be made by pansies. By far the greater part of the garden work is done in the spare time of the station agents, from the motive for love of gardening, pride in their surroundings and in competition for the numerous prizes offered for displays. Approximately 1,500 gardens are now maintained.

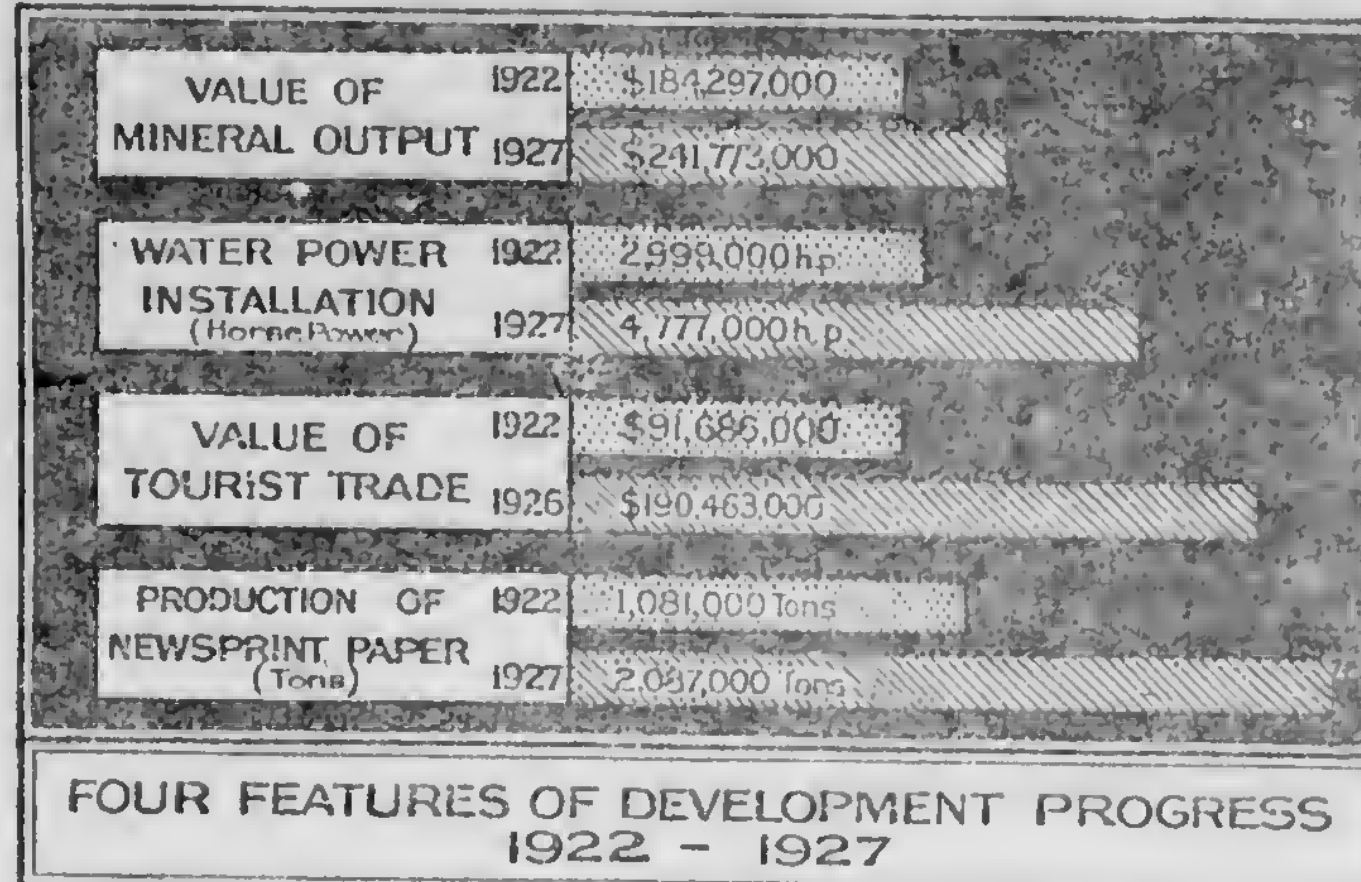

Many Factors Responsible For High Level Of Prosperity Enjoyed By Canada To-Day

Seldom has Canada's business outlook shown such a volte-face as has occurred in the last few years. Six years ago the Dominion struggled in the depths of depression. Today prosperity is at a high level, and the year 1927 has been authoritatively labelled as "the most expansive year in business enterprise that this country has ever known."

Many factors have had a hand in this about-turn—the improvement of

sources and to speed up the return to prosperity by the creation of new industries, new production and new trade.

Much has been said of the extent of Canada's resources but it has probably been their variety, as distinct from their sheer extent, that has stood the country in greatest stead. New development has been versatile and widely diffused, not confined to one or two lines. And Canadian business has enjoyed a great, emulative stream of

world conditions; the series of good crop years; the re-adjustment of prices; the capacity shown by the Canadian people in the face of adversity.

But, back of all these, the Dominion's business recovery has had the inestimable benefit of one special advantage. The Canadian people have been in the fortunate position of possessing a country with great undeveloped resources. They have not, in the same degree as the people of older countries, been compelled to wait and rely upon the revival of old-established industry and trade. They have been able to turn to undeveloped re-

fresh strength drawn from many different sources—from growth in forest industry, in water-power development, in mining, and in tourist trade which is largely attributable to the Dominion's scenic and other recreational resources.

While the comparative figures, for 1922 and 1927, of mining output, installed water-power, newsprint production and tourist revenue cover only four fields, they serve at least to suggest what a powerful and versatile impetus Canadian business has derived in the last few years from the extension of natural resources development.

Sport For the Angler

Four Million Fish Eggs To Stock Lakes Of Western Canada

Last year, between June and September, the fish culture branch of the Department of Marine and Fisheries, shipped, over Canadian National Railway lines, a total of nearly four million fish fry or eggs. The exact figure was 3,857,000. The greatest number went from Fort Qu'Appelle to Biggar, Sask., where the Lizard and Wilson Lakes were stocked with pickerel, nearly 1,000,000 of them. The month of June was the heaviest and the species most commonly distributed was pickerel. In addition to those which went to Biggar, pickerel was sent from Fort Qu'Appelle to Hays, to stock the Lady and Elbow Lakes, and from Winnipeg to Kamsack, Nucleite, Roblin, Erickson, Glenora, and Angusville, for Mudge, Pelican, Mitchell, Clear, Rock, Fish and Goose Lakes. In June, Kamloops sent Chilli-wack for Cultus Lake, 40,000 Kamloops trout, and Prince Rupert sent 100,000 of the same species to Smithers for Lake Katblyn. Rainbow trout went from Calgary to Edson, for distribution in the waters of Sundance, Hornback, Trout, Wolf and Edson Lakes. Fort Qu'Appelle sent two shipments of salmon trout to North Battleford, a total of more than 200,000 eggs. Brown trout and cut throat trout were shipped to Jasper, Mines Landing and Colwood, from Calgary and Cowichan Lake. In July the only shipment made was 15,000 rainbow trout, from Calgary to Peers for Carrot Creek. August was given over entirely to perch and with one exception (Regina), the eggs were sent from Fort Qu'Appelle. The odd thing was that while some of the Qu'Appelle shipments went to Regina, the one Regina shipment was for Fort Qu'Appelle. Most of the perch were for Saskatchewan lakes. In September, Fort Qu'Appelle sent 1,750 perch fry to Sonderman and York Lakes, the only shipment in that month.

Extend Work Of Travelling Clinics
The travelling clinics introduced by the Provincial Department of Health, consisting of three nurses, two doctors and a dentist, to visit rural districts in Northern Alberta, have been so successful that it is proposed to extend this work to cover the entire province.

After having given more than 60 years of her life to agriculture a French woman was awarded the Cross of the Legion.

"You ain't said nothin' at all, bo. When Ah hit's a man he don't."

Discuss Price Of Apples

Reason For Spread In Price In East Is Given In House Of Commons

Some interesting information as to the spread in the price received by the producer of British Columbia apples and that paid by the consumer in Ottawa, was given in the House of Commons in answer to a question by Grote Sterling (Conservative, Yale).

Mr. Sterling said that the producer in British Columbia received \$2.35 for a box of extra fancy Delicious apples, containing about 140 apples. The consumer in Ottawa paid, he said, 7 1/2 cents a piece for these apples which was equivalent to \$10.50 per box. He asked for an explanation of the spread.

Hon. W. R. Motherwell, minister of agriculture, gave details with respect to fancy Delicious apples as prices for the extra fancy were not obtainable. The shipping point price of the apples was \$2.45, the freight to Ottawa 75 cents, heating charges 10 cents, brokerage 5 cents, making a total of \$3.35. The wholesale price to the retailer was usually \$3.75 a box and the retail price to the consumer usually \$4.50 a box.

Mr. Motherwell pointed out that when apples are "sold by the specimen," the retail price is higher, ranging from two apples for 25 cents to five apples for 25 cents, according to the size. The average was four for 25 cents.

Menace Of The Future

Because an average automobile uses up 100 times as much air as a human being and emits 400 times as much carbon dioxide, it is prophesied that in the future, congested population centres will bar them in the interest of public health and all transportation will be by electric power instead.

WORLD HAPPENINGS BRIEFLY TOLD

Russia has filed with the League of Nations, a proposal for the abolition of all armaments, in line with the suggestion she made at the December League disarmament meeting.

The Royal Society of Canada will hold its annual meeting in Winnipeg, May 23-26. It was announced by President Prof. A. H. R. Bullock. This is the first time the society has convened west of the Great Lakes.

Herbert Swanson, 52, pioneer farmer, four miles north of Welwyn, Sask., was instantly killed about half a mile from the town when a sleigh load of wheat tipped over him and smothered him.

The complete stamping out of leprosy within the next decade is predicted in the annual report of the British Leprosy Relief Association, by means of a treatment with oil extracted from the dried fruit of the hydnocarpus tree.

Failure to meet the right man is the chief cause of spinsterhood among educated women, says Dr. Katherine Dement Davis, for ten years secretary of the New York bureau of social hygiene. She has just completed a survey of the situation.

Unemployed insurance, national in scope, is recommended in a report submitted to the provincial legislature by the Seasonal Unemployment Commission, headed by Dr. R. W. Murdoch, of the Manitoba Agricultural College.

Attempts of the tri-motored Zenith aeroplane Albatross to create a new endurance world flight record was unsuccessful. The machine, piloted by A. Peterson and C. F. Rocherville, was forced down at the end of 26 hours owing to motor trouble.

The following appointments in the Royal Canadian Naval Services have been approved, it was announced by the department of national defence: E. P. Shaver, Edmonton, confirmed in the rank of sub-lieutenant, and G. A. Agnew, Saskatoon, confirmed in the rank of sub-lieutenant.

WHY TORTURE THE LITTLE ONES

Mothers, do you think it fair to torture your little ones by forcing them to take ill-tasting oils when they need a laxative medicine? Don't you find that the child's dread of these medicines often do more harm than good?

Baby's Own Tablets are the modern substitute for these nauseous doses. They are the very medicine the child requires and are so pleasant to take that they are as easy to administer as a glass of water. They are the perfect remedy for all the minor ailments of little ones, being absolutely guaranteed free from injurious drugs.

Baby's Own Tablets accomplish all that castor oil and other bad-tasting remedies can do. In fact they accomplish more as they do not leave the child exhausted from its struggle against taking medicine. They relieve teething pains, banish indigestion and constipation, break up colds and simple fevers and promote healthful, refreshing sleep. They are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Andean Indians have swollen faces from the habit of chewing coca leaves.

RETAIN YOUR HAIR.

Minard's Liniment stimulates growth of hair. Keeps it glossy and kills dandruff.

SUNDAY SCHOOL LESSON

MARCH 4

JESUS AND THE TWELVE

Golden Text: "Go ye into all the world, and preach the gospel to the whole creation." Mark 16:15.

Lesson: Mark 1:16-20; 2:13, 14; 3:13-19; 6:7-13, 30.

Devotional Reading: Romans 12:1-8.

Explanations and Comments

1. The Choice Of the Twelve, 3:13, 14. One day Jesus went up the mountain to pray; he continued there all night in prayer, Luke tells us. Then as companions for himself and as messengers to the people he chose from among all his followers a little company of twelve men. "The number is significant and symbolical, a clear allusion to the tribes of a new Israel. And by that choice of twelve Christ did two things: (1) He made stupendous claim for himself. Every Jew knew in a moment what the choice of twelve implied. It implied that Jesus was the promised and long expected Messiah. It meant that he was the fulfillment of ancient prophecy. And (2) It provided the apostles themselves with a constant stimulus to devotion and support of faith. It carried their minds back to the promises."—J. D. Jones.

They were ordinary men, these twelve, men from the ordinary ranks of life. Four of them were fishermen, one was a tax-collector. It was the power of the gospel that it built up its mission on the lives of ordinary men. G. K. Chesterton says: It took ordinary men and made of them apostles, missionaries, evangelists, martyrs.

"Jesus found twelve ordinary men and discovered extraordinary capacity in them. They had had little opportunity. They did not have a great past. He saw that they could have a great future. He judged them by the spot where the infinite touched them. He lived with them. He talked with them, and then He gave them something to do. He knew that only when listening is turned into action does it become character. He made them heralds of the Kingdom, and they grew in stature even as they announced its coming."—Lynn H. Hough.

A Smart New Coat

This unusually smart coat has a shawl collar, long raglan sleeves finished with turn-back cuffs, patch-pockets and a removable belt. No. 1716 is for ladies and misses, and is in sizes 16 years, 36, 38, 40, 42 and 44 inches bust. Size 38 requires 3 1/2 yards 42-inch, or 3 yards 54-inch material without nap; 3 1/4 yards 40-inch lining; 3/4 yard 5 1/2-inch fur. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical style, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

No Economic Value

Report Against Gland Treatment Of Livestock Is Given

A committee of experts appointed by the board of agriculture, of London, Eng., has issued an adverse report on Dr. Serge Voronoff's gland treatment of livestock. The report admits that the claim is possibly justified, that the effect of the treatment was rejuvenation of aged and decrepit male sheep and similar animals, but considers the evidence was not based on critical experimentation, and that, therefore, the data given fails to warrant an estimate of economic value.

One-fifth of the United States is covered by forests.

Women Of S. A. Want Franchise

A bill providing for the extension of the franchise to women in South Africa has passed the committee stage in the house of assembly, despite strenuous opposition from the Nationalist party, led by Premier J. B. M. Hertzog. The premier takes the ground that the question as to rights of the natives should be settled first. The Women's Enfranchisement Bill limits the granting of the vote to white women.

"It doesn't matter; I can come back," he said. "There's probably a train that comes back."

"I'm sorry!" said Icky. "I've made you miss your train!"

Made Fatal Voyage

Six Japs Are Suffocated In Hold Of Ship In Attempt To Enter U.S.

The bodies of six Japanese who attempted to smuggle themselves into the United States were found in the hold of the Tasiko Maru, which reached Tokyo from Seattle, Washington. The ship's cook confessed to hiding them in the hold on December 20 when the Tasiko Maru sailed for Seattle. From brief notes the men left it was believed they suffocated before the ship left Yokohama after which the cook became frightened and kept their death secret until the ship returned to Japan.

EXPERT MOVERS

Sir John and Lady Martin-Harvey, famous English players of Sabatini's "Searamonte," who with their company of 25 actors spent only three hours entraining at Halifax from the Cunarder Antonia for their Canadian tour, with hundreds of pounds of dresses, disguises, guns, and what-not to be piled in two 65-foot box cars. No fuss no time lost. A lesson to householders who move in May.

Arrests Are Made In Connection With Chicago Train Robbery

Chicago.—Within 24 hours of the spectacular holdup of a Grand Trunk train on the southwestern outskirts of Chicago, the police announced that one arrested suspect had confessed to his share in the robbery, implicating seven men, including two railroad workers.

More than \$17,000 of the \$133,000 loot was recovered and 25 suspects, including five women, were arrested in several raids, the police said. Virtually all were connected with the holdup, the police reported.

The man who confessed was named as William Donovan. He was reported to have told police that he and five others held up and robbed the train while the two unnamed railroad workers supplied them with the information enabling them to board the train which carried funds to meet the payrolls of four Harvey factories. Harvey is an industrial suburb on the southwest side.

While those in custody were held incommunicado tonight, the police, who bagged the suspects in a series of quick raids, said it was through the ready admission of a woman, Mrs. Donovan, wife of William, that the most important information concerning the train holdup was obtained.

From her information, the police announced, they raided the home of "Limpy Charley" Cleaver, on the south side, where the \$17,000 in addition to \$600 in bonds was found and five women and three men, including Cleaver, arrested.

The detectives said when they started to search Cleaver's home he warned them to keep their hands off several bottles on a shelf.

"Don't touch those bottles!" the detectives quoted him as saying. "They're filled with explosives and you'll blow up this whole block!"

The bomb squad was called, examined the contents of the bottles and found no explosives. However, search of a flour barrel brought to light approximately \$17,000 in currency.

Cleaver, his wife and three men were arrested at his home.

New Jail For Manitoba

Will Be Located Where Farming Operations May Be Carried On

Winnipeg.—Manitoba is to have a new provincial jail and prisoners who are sent to it will have to work at farming operations, according to an announcement made by Hon. W. J. Major, Attorney-General, in the Legislature.

The site of the new institution to cost \$300,000, has not been selected yet, but the Attorney-General stated that it would be located at a place where farming operations could be carried on in combination with the ordinary prison routine.

Park To Be Leased

Victoria.—Assiniboine Park, on the Alberta boundary, will be leased to the Canadian Pacific Railway, Hon. T. D. Pattullo, Minister of Lands, announced in the Legislature, when he introduced new parks legislation, designed to put administration of the province's pleasure areas on a broader and more workable basis.

London Chimes Travel Nearly Around World

Re-Broadcast In Australia Are Heard In Buffalo, N.Y.

Buffalo, N.Y.—Chimes of Big Ben in London, re-broadcast by Station 2-FC in Sydney, Australia, went on the air over a radio station here.

The evening programme of the Australian station was broadcast by the local stations. After the usual musical programme, the Sydney station picked up the London broadcast and in what is believed to be the first experiment of its kind in the history of radio, chimes in London were heard in Buffalo, after travelling nearly around the world. At one point in the broadcast the Sydney announcer called "Hello, America," and, sent greetings from Australia to the people of Western New York.

Some difficulty was had with heavy atmospheric conditions, but after preliminary tests, signals were picked up very clearly.

Auto Racer Near Death

Had Miraculous Escape In Attempt To Set New Speed Record

Daytona Beach, Fla.—Frank Lockhart, internationally known race driver of Indianapolis, narrowly escaped instant death when he lost control of his powerful Stutz Blackhawk Special during an attempt to set a new world's automobile speed record and hurtled with it into the surf while travelling at 225 miles an hour. A superficial examination revealed no obviously serious hurts.

The 25-year-old racer suffered a severe shock but otherwise was not seriously hurt. This was the pronouncement of physicians at the hospital to which he was taken.

A complete examination, the doctors said, showed no broken bones, no internal injuries, and that aside from a few lacerations on his face, Lockhart was suffering principally from shock.

Wins Quebec Dog Derby

Emile St. Goddard Beats Nearest Competitor By Two Minutes

Quebec.—Emile St. Goddard, musher of The Pas, Man., won the annual international dog derby here by defeating Leonard Seppala in the third day's heat by 2 minutes and 33 seconds.

St. Goddard's time for the 41-mile run was 3:39:07, while Seppala was second in 3:41:40, and Earl Brydges, The Pas, Man., third in 3:42:50.

The total time for the races for the three days was: 1, St. Goddard, 11:14:17; 2, Seppala, 11:17:20; 3, Brydges, 11:29:25.

British Girls To Visit Canada

London.—Announcement has been made that the Society for Overseas Settlement of British Women is arranging for 25 public and secondary school girls between the ages of 17 and 19 to visit Canada in August and remain there until October. The party will be in charge of Miss Edith Thompson, head of the all-England women's hockey team.

Federal Aid Cancelled

Contributions To Unemployment Relief In Provinces Was War-Time Measure

Ottawa.—Withdrawal of Federal contributions to the provinces for unemployment relief is announced in a letter from Premier King to Premier Bracken, of Manitoba, dated February 20.

The Prime Minister in part says that the policy of the government as set out at the Dominion-Provincial conference was "that such assistance as had been given from the Federal treasury had justification as a war-time measure to meet conditions arising out of the war and the re-establishment of returned men in civil life."

Mr. King continues:

"It was stated at the conference that the justification for Federal assistance in the matter of unemployment on this ground no longer exists. In our opinion other circumstances have not arisen which at the present time justify contributions from the Federal treasury to either the provinces or to municipalities as an assistance in dealing with the problem of unemployment."

The letter was in answer to inquiries from the Manitoba government as to what aid could be expected this year.

China Hopes For Improvement

People Looking For Better Times During This Year

Canton.—Thankful that the "year of the rabbit" just closed is behind them, the people of China today are hoping for better times under the fiery watch of the mystic dragon now presiding over the current year.

The "year of the rabbit" ended in the midst of crippled domestic trade, curtailed shipments abroad and in general a dreary commercial outlook and Canton and South China ushered in the New Year hopeful but with grave commercial misgivings.

The new lunar year means much to China and her more than four hundred millions of persons. In addition to being practically her only holiday of the year, it is the chief commercial settling day when all accounts of the dying year are "reckoned up and paid."

Will Support Prohibition

Washington.—Declaring the United States has "deliberately undertaken a great social and economic experiment, noble in motive and far-reaching in purpose," Secretary Hoover, as a presidential candidate, pledged himself to support the prohibition amendment.

NEW CANADIAN PEER

Lord Strathcona and Mount Royal, new Canadian peer, who is a member of the royal commission on India reforms which was greeted by rioting on its arrival in Madras.

Talking Dog Has Rival

Great Dane Converses With Reporter Of New York Paper

New York.—The New York Herald-Tribune says that New York has a talkative dog comparable to Princess Jacqueline, French bulldog, reported to be the sensation of the Eastern dog show in Boston.

Boulderwell, a great Dane owned by Mrs. J. Stuart Tompkins, wife of a New York attorney, the paper states, conversed with a reporter and demonstrated its ability to say "How do you do," "I want to go out," and a number of other phrases.

Will Probe Accidents

Winnipeg.—Investigation of the problem of accident prevention in Manitoba industries is to be undertaken by the provincial government. The report of the workmen's compensation board, tabled in the Legislature, brought a demand for a full inquiry. An average of 36 accidents per working day was recorded in Manitoba factories and industries in 1927.

Husky Twice Saves Master's Life

"Mountie," leader of the Chateau Frontenac dog-team, has many friends, but none who watch his career with more interest than Sergeant William Gremon, of the Royal Canadian Mounted Police. The Sergeant, who is six-foot-three and the crack marksman of the force tells, with tears of pride in his eyes, how Mountie, whom he raised from a pup, saved his life on two occasions.

An early freeze in the North Country. The team with "Mountie" in the lead crossing Sturgeon Lake. Then the realization that the ice was cracking and bending and the knowledge that it was too thin to allow the sleigh and driver to stand still long enough to turn. There was no retracing, they must go on. "Mountie" waited for no word of command. He led the team on, on, at a break-neck speed across an expanse of severer miles, with death facing them at every step, and reached the opposite shore in safety.

Once again, the following year, the Sergeant claims that "Mountie" saved his life, when he cleared with one bound a cut in the ice, six feet wide, caused by the swift current, the others following.

Over thousands of miles through the snow bound north, on missions of life and death, Mountie has accompanied Sergeant Gremon. When Mountie left five years ago for Quebec, the Sergeant was heard to say that he had lost his most faithful and his most beloved friend.

Opposition Member Says Liberals Not Responsible For Present Prosperity

Established New Air Records

British Aviator Reaches Australia From England In Fifteen Days

London.—Bert Hinkler, British aviator who arrived in Australia Feb. 22, is acclaimed in London as having performed one of the most remarkable feats of flying skill and endurance that has yet been accomplished.

Claims are made that the 15-day flight established five new air records, being the fastest flight between England and Australia; the longest light plane flight ever made; the longest solo flight in any kind of an aeroplane; the fastest journey between England and India, and the first non-stop flight between London and Rome.

It developed that Hinkler was poorer by about \$10,000 than he would have been if he had completed arrangements for a policy with Lloyds which he previously was stated to have taken out. The underwriters said that Hinkler had arranged for a policy of about £2,000 against reaching Australia within 16 days, but for some reason left without completing the negotiations.

The Daily Mail said that the real object of Bert Hinkler's flight to Australia was to test a new undercarriage. This the British flier invented himself and to it he attributed his success in his present flight.

The plane he uses is fitted with folding wings and an undercarriage which swings back when the wings are folded, enabling the flier to house the machine in a garage and making it easy for one man to handle.

Hinkler sent a message to London saying he never had the least assistance in moving the machine since he started.

C.P.R. Traffic Chief Dead

C. E. E. Ussher Had Been With Railway For 42 Years

Montreal.—C. E. E. Ussher, general passenger traffic manager of the Canadian Pacific Railway, died suddenly at his residence in Westmount. He was 71 years of age.

Mr. Ussher was born at Chrysler's farm, Chippewa, Ont., Dec. 29, 1857. He joined the C.P.R. on Nov. 1, 1886 as chief ticket clerk in the passenger department at Montreal.

His rise to executive office was rapid, culminating in his appointment as general passenger traffic manager of the company on Sept. 1, 1922, with jurisdiction over passenger and traffic matters covering rail and steamships on the Atlantic and Pacific and also gave him charge of the entire hotel chain of the company.

Mr. Ussher originally intended to go in for a musical career but owing to force of circumstances entered railroad instead.

He joined the Canadian Pacific Railway when the trans-continental service was inaugurated and was therefore contemporary with the extension of that railway across the continent. He had seen it grow to a world-wide organization, stretching through the Dominion and encircling the globe.

Ottawa.—An intimation that some of those members who sit with him in the Commons chamber will not vote for the Government's budget proposals, came from J. S. Woodsworth, Labor member for Winnipeg North Centre, during continued debate.

"I am afraid some of us cannot consistently vote for the budget as it stands," declared Mr. Woodsworth. "We see in it, as has been stated in the sub-amendment, a departure from the principle of the income tax. That, to me, is very important. I should like to see the income tax greatly increased. I should like to see the higher regions still more greatly increased."

Mr. Woodsworth's seat is located in the corner of the chamber where the Labor, U.F.A. and certain of the Ontario Progressives sit.

It was due to no action of the present government that any prosperity had come to Canada, declared Lieut.-Col. J. Arthurs (Conservative, Parry Sound), continuing debate. At the same time there was nothing in the present budget that would induce prosperity to come to this country.

Col. Arthurs said that in the major industries of mining and pulp manufacture all incentives had been contributed by the various provincial governments and that these were not "subject to the whim of the Government at Ottawa."

Col. Arthurs pointed to the efforts put forward by the various local administrations to encourage tourist trade and asserted that the first stimulus to this had been given by a Conservative Federal Government which had originally given the grant toward the building of good roads. Nothing had been done by the Dominion administration to advertise Canada in this respect. The Immigration department used to issue advertisements but for some time these had been discontinued.

Hon. Charles Stewart, Minister of the Interior, interjected that "Col. Arthurs apparently did not read the newspapers."

The day will come very soon when the importance of the home market will be felt even by those who only grow wheat in Canada, declared Col. Arthurs. Russia, in the near future, he continued, will enter the field of competition as a producing nation.

The value of our domestic market should be borne in mind and the government should adopt a policy that would protect Canadian producers, he said.

Col. Arthurs complained that the Federal Government seemed able to find \$2,000,000 for parks in Ottawa, but could not spend one cent to help the iron industry of the country and give employment to thousands of men. Canada needed a policy that would utilize raw materials and manufacture them in this country, a real policy of Canada for the Canadians.

The value of milk and its products exported from Canada in the calendar year 1927, was \$1,580,239, an increase of \$623,500 over 1926.

Would Reduce Number Of Ports Of Entry For Customs Department

Ottawa.—A number of recommendations dealing with the re-organization of the Department of National Revenue are contained in the report of Messrs. Clarkson, Gordon and Dilworth, chartered accountants of Toronto, which was tabled by the Hon. W. D. Ether in the House of Commons recently. This firm acted under the authorization of the order-in-council of August 7, 1926, as auditors to the Royal customs commission.

The report says that from time to time the Minister of National Revenue has put into effect a number of improvements recommended by the investigators, and that these have added to the efficiency of the department.

One of the chief recommendations declared that "to utilize effectively such a body of competent appraisers there should be concentrated in about 100 ports the examination and appraisal of all importations on a commercial scale, which at present pass through some 700 ports. A large number of the present ports should be closed entirely."

It is shown in the report that there are 729 ports, out-ports and stations in Canada and that in 234 of these the expenditures for administration exceeded the revenue in the year 1926.

It is suggested that the passing of importations on a commercial scale should be taken out of the hands of all ports having a staff of less than four persons except where for special and sufficient reasons this could not be practical.

Other recommendations are that a special investigation staff be appointed to deal with suspected evasions of duties and taxes or other frauds; that moieties to informers be paid more promptly and in more liberal amounts, while those to officers be abolished, and that the commissioners of customs, excise and income tax, as a committee, be given power to denote or dismiss members of their staffs without approval of the minister or governor-in-council. It also is recommended that a board of appeal be established to protect employees against any possible misuse of such powers.

Big Reduction Is Made In United States Naval Programme

Washington.—Shashing Secretary Wilbur's recommendation for 71 new warships, the house naval committee decided to authorize the construction of 16 ships, one of them an aircraft carrier, and the remainder cruisers of the 10,000-ton class. It turned "thumbs down" on new submarines.

This action, taken after a protracted executive session, was described by Chairman Butler as practically unanimous and in line with the original United States proposal to the unsuccessful Geneva arms conference.

Wilbur had urged the committee to approve a building program of 25 cruisers, five aircraft carriers, nine destroyer leaders and 32 submarines, representing the program as having the backing of President Coolidge.

Butler estimated the committee's program would cost \$274,000,000 as compared with \$740,000,000 for the

administration's plan, both figures excluding the increase in aircraft and personnel for which the additional ships would call.

The committee, in refusing to provide for submarines, turned a deaf ear not only to the naval secretary but also to an emphatic protest by one of its own members, Representative McClintock, Democrat, Oklahoma.

The committee provided that the 15 cruisers should be started within three years and completed within six and that the aircraft carrier be started within two years.

The committee also adopted a provision that "in the event of an agreement for further limitation of naval armament by international conference to which the United States is a signatory power, the President hereby authorized and empowered to suspend in whole or part any of the naval construction authorized under this act."

Great Future For Canada

British Editor Predicts Dominion Will Become One Of the Greatest Powers

It is always interesting for an individual or a country to see himself or itself through the eyes of another, particularly of strangers. Last summer a number of outstanding British journalists visited Canada and toured the Dominion from coast to coast. Since returning to their own country they have been giving the readers of the various papers they control the benefit of their impartial impressions and conclusions regarding this country. One of these visitors was Sir James Owen of The Exeter Times, in an article in that paper he states that the estimate of Canadian cities he had formed previous to his visit last year was entirely wrong. He had expected to find the cities of Canada Americanized in their thought, character and outlook. Instead of that he finds them "essentially Canadian, looking over north and east and west for their development and wealth, not south."

Sir James Owen recognizes that there is a strong pull from the United States felt in Canada, and but for the deeply ingrained national pride of the Dominion this attraction from the south, he feels, would not have been overcome. Of the future he says: "Twenty years, thirty, forty years hence—years are nothing in the life of a nation—Canada will become in reality what she is potentially today, one of the greatest powers of the world—territorial, economic, industrial."

Here is one visitor at least who has formed an estimate of Canada's resources and potentialities that Canadians believe is in accordance with facts. The Imperial tie, Sir James Owen thinks, will also grow stronger through the coming years. His judgment in this respect is again correct.—Toronto Globe.

For Fattening Hogs

Reclaimed Elevator Screenings Are Found To Have a High Feeding Value

A series of tests have been made at several of the Dominion Agricultural Experimental Stations to ascertain the value of reclaimed elevator screenings as a feed for hogs. These reclaimed screenings are described in a new Dominion Department of Agriculture pamphlet on "Screenings as a Feed for Live Stock," as containing about 50 to 70 per cent. of wild buckwheat, 20 to 40 per cent. broken or shrunken wheat, some wild oats, and not over 3 per cent. of small weed seeds.

One experiment conducted at the Central Farm at Ottawa, showed that finely ground reclaimed screenings had a high feeding value for hogs. They were very much better than screenings not reclaimed. In tests at the Brandon Farm the reclaimed elevator screenings gave more rapid gains in fattening hogs and a lower feed consumption per pound of gain than did barley. In experiments at the Leamoville Station, the reclaimed screenings, when fed alone, compared favorably with mixed meal and with barley rations. They gave still better results, however, when fed in mixtures. Tests at other experimental stations have given similar results.

In all the tests made, at the various stations reclaimed elevator screenings showed a high feeding value, comparing favorably with good meal mixtures and with single feeds as barley, corn and oats. Unusually high rates of gain were made with the hogs fed screenings, these being exceeded only by lots fed on good meal mixtures. In all cases the screenings were finely ground. The pamphlet may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

A miser is a great lover of generosity in everybody but himself.

"My nerves are so bad that I have not been able to close my eyes for a week. What do you recommend?" "Boxing. After my first lesson I couldn't open my eyes for a week." — Lustig's Kolner Zeitung, Cologne.

W. N. J. 1722

Value Of Alberta Farm Production

1927 Crop The Largest In The History Of The Province

Value of farm production of all kinds in the province of Alberta in 1927 reached a grand total of \$330,143,152, far and away the biggest in the history of the province and just about 26 times the value of farm products in 1906. The acreage under crop last year, exclusive of summer-fallow and new breaking was 10,981,270 acres, or 22 times the 1906 total.

Included in the sum total of the province's agricultural production in 1927 were field, root and fodder crops to the value of \$272,891,152; dairy products \$20,750,000; miscellaneous \$36,502,000.

Two of the comparatively new lines of production that give considerable promise for the future are honey and beet sugar.

The production in all lines last year averaged \$1,335 per farm in Alberta, which is a thousand dollars better than 1926.

The wheat crop alone brought \$16,000,000 of new wealth in 1927 in excess of the previous most valuable crop, which was that of 1920. Last year's crop was worth three times that of 1916 and almost twice that of 1925.

The value of livestock in Alberta has reached a total of \$106,000,000, almost four times the figures of 1926.

Heavy Export Trade

Alberta Exported Goods To U.S. To Value Of Over Nine Million Dollars In 1927

The Province of Alberta exported goods to the value of \$9,129,305 to the United States during the year 1927, according to the annual report of S. C. Reat, United States Consul for Calgary district. The total exports show an increase of \$764,660 or 17 per cent. over 1926. Cattle and hogs held a conspicuous place in these exports, the former amounting to \$1,215,656 and the latter to \$982,015.

Voice (on telephone): "Will you tell the doctor to come at once—my little girl has swallowed a needle." Maid: "The doctor is busy, do you need the needle at once?"

"Maizie" Most Profitable Hen

Famous White Leghorn Hen Is a Revenue Producer

"Maizie" the famous white Leghorn hen owned by the University of British Columbia farm, officially known as Hen No. 6, the world's champion layer with 351 eggs in a year, is proving a substantial revenue producer for the University of British Columbia.

Last year the sale of pedigreed poultry stock originating from "Maizie" returned to the University \$2,225. Two cockerels of hers shipped to a poultry raiser in Ohio fetched \$500 each. Another cockerel was sold in New Jersey for \$300. Two other cockerels were disposed of at \$150 each and two pullets at \$100 each. Proceeds from seventeen hatching eggs were \$425.

The University receipts on sale of pedigreed British Columbia stock totaled \$7,225 for the year. This sum included the proceeds from the sale of Hen F319, a 355-egg registered hen, which fetched \$500. Sale of twelve of her offspring brought the total amount realized from this bird to \$1,350.

"Maizie" still graces the University pen, despite the fact that \$1,000 was offered for her last year and \$3,000 for the pen of which she is a member.

It has become quite evident since the world's poultry congress, held in Ottawa in August, 1927, that the University of British Columbia could have disposed of many more birds at very satisfactory prices if it had them to spare.

Long Distance Phone Record

The San Francisco Examiner reported a telephone conversation between Carl Raiss, San Francisco broker, and George Lust, Berlin banker, as the greatest distance connection ever completed. Each in his home city, Raiss and Lust were able to converse over 6,000 intervening miles with no difficulty. They talked 11 minutes and the call cost \$360.

Statistics show that the average British woman now is 5 feet, 2 inches tall, has a "pull" of 183 pounds and a grip of 58 pounds.

Growth Of Life Insurance

United States and Canada Lead All Other Countries

Only the United States exceeds Canada among the countries of the world in the per capita amount of life insurance carried by the people. The total sum of insurance in force in Canada in 1927 was \$5,400,000,000, an increase of \$450,000,000 over 1926, representing a per capita insurance of over \$540. In the United States the amount of life insurance carried per head of population is placed at over \$600.

In the past ten years the increase in the amount of life insurance taken out by the people of Canada constitutes a world's record, according to the calculations of actuaries. It is an interesting fact that no one has ever lost a cent as a result of the failure of a Canadian life insurance company, which is due to the government supervision over such companies for the protection of policy holders.

Nearly \$300,000,000 is being paid annually by Canadians in life insurance premiums. There is probably no better index of the prosperity of the people.

When To Irrigate the Alfalfa Crop

One Good Irrigation For Each Cutting All That Is Needed

At the Lethbridge, Alberta Experimental Station, data on the irrigation of alfalfa have been collected for the last four years. It has been found that an irrigation in the fall or early in May gives a good first crop and another irrigation when the crop is about 12 inches high further increases the yield. Where the first application in the spring was made when the crop was 12 inches high the average yield was decreased one ton per acre as compared to a fall or early spring irrigation. For the second crop, an irrigation applied a few days before or immediately after the first crop was harvested gave a satisfactory return. On the whole, except in special cases such as unusually dry seasons or on certain soils, one good irrigation for each cutting will give satisfactory results.

The United States admitted 805,223 immigrants in 1921.

ANTIQUITIES OF THE FUTURE

Preserving the Ordinary Things Of Today For the Benefit Of Later Generations

In his comments on the letters of the English poet, Cowper, Goldwin Smith makes the observation that it is more difficult to secure the antiquities of the generation preceding ours than it is to acquire those of remote ages. It is almost as easy, he writes, to get a personal memento of Priam or Nimrod as it is to get a spinning-wheel or a tinder-box, and while an Egyptian wig is attainable, a wig of the Georgian era is very scarce. To put it in other words, although we attach great value to the relics of a remote past, each generation falls to realize that the ordinary things of its own day will be intensely fascinating to the people of the future.

It seems, too, that the things of everyday life do more towards making past generations live for us than mighty monuments or the records of great historical events. A child's toy is more poignant than the pyramids and the deer-horn pluck of some neolithic workman spells more to us than the ruins of Stonehenge.

Yet these ordinary things are just those which no one thinks of preserving. They are, we imagine, too commonplace for that. We forget that to the people of a hundred years hence the ordinary things we do and the commonplace objects of our daily life will make us live again more vividly than a hundred Hansards or a thousand histories of the Great War. If a man of today were to keep a diary like that of Pepys, in which a myriad trivial incidents are set down, posterity would not find it trivial; nor would it find the ordinary things described commonplace.

Pepys' diary is one illustration of the extraordinary value which a detailed record of the average life of a person is to future generations. Another is the Elizabethan school book which was discovered a short time ago. In it was set down the things which the child who owned the book had to do each day. As a result across the years we can see a picture of the daily life of an Elizabethan youngster, something which is more vivid than the voyages of Drake or the defeat of the Spanish Armada. What is true of these instances would be equally true of some similar account of the life of today. We need museums not only for the antiquities of the past but for those things which will be the antiquities of the future.—Edmonton Journal.

Canada For the Young

Wonderful Possibilities On Western Farms For Those Willing To Work

It would be useless and inhuman to despatch shiploads of men to Canada if, when they arrived, there were no work for them to do and no houses to shelter them. The process of transferring our surplus population to the Dominion must be a gradual one. Canada needs especially to catch her future citizens when young. Nothing could be more praiseworthy than the work of those agencies which are sending British children to Canadian rural homes and British public school boys to be trained on Western farms. For the young, indeed, Canada has illimitable possibilities. The Prince of Wales can appeal especially to them from his own experience of Canadian life. His example has already fired many a British boy with the desire to make his future home in Canada, where anyone who cares to work can do well.

The Things Unseen

It is the things unseen that are most availing for the healing of the nations and minister most to a mind diseased. It is things unseen that conduce to growth and to the silent building of the soul. Both in their impact upon man and in their reflection from him, it is unseen things that are most potent. Influences that no one can discern as either burning or shining, radiations which are not explicit, still less tangible, these powers in the ultra-red and ultraviolet regions of the spirit are strong beyond the telling.

Form Sight Saving Class

The Vancouver School Board's first sight-saving class has just been established. Mrs. A. M. Cleverley, of Toronto, who has taught sight-saving classes in various parts of the Dominion, will have charge. Sight conservation classes use text books typographically suitable for persons with poor vision.

No man has to serve an apprenticeship in order to learn how to make mistakes.

An organ in the Philippine Islands has furnished music for more than 100 years.

Predicts Billion Bushel Crop

Almost Unlimited Possibilities Of Wheat Growing In Western Canada

Eventually Canada will produce a billion bushel crop of wheat annually and will have no difficulty in finding a market for it, predicted Hon. T. A. Cramer, president and general manager of the United Grain Growers Ltd., former Federal Minister of Agriculture for Canada, in a recent address at Port Arthur. The annual crop of wheat produced in the Dominion is now close to half a million bushels. Last year it was over 410,000,000 bushels.

Referring to the development of Western Canada, Hon. Mr. Cramer said there was no country in the world where so great a development had taken place in the past forty years as in the Canadian West, and there was no country which had so great potentialities. Speaking of the export of grain, he said that the Dominion was exporting wheat to every country of Europe, also to the Orient, and declared that with the population of Europe growing at the rate of 2,500,000 every year it would be an ever-growing market for the product of Canadian farms.

Canada is admirably located to furnish these supplies, he pointed out. The United States with its population of nearly 115,000,000, and growing at the rate of from 1,500,000 to 2,000,000 every year, would soon cease to be a good exporting nation, as it was already importing foodstuffs in increasing quantities from Canada, such as dairy and other products.

Making Fountain Pens

Splitting the Nibs Is Most Particular Part Of Work

A visit to a factory where fountain pens are made will prove both instructive and fascinating. There, says a writer in Tit Bits, you will see long sheets of vulcanite, flattened sheets of burnished gold, and tiny specks of osmiridium or other alloys used for pointing pens, all of which are being transformed in an incredibly short space of time into the finished article. The works are divided into two main parts—the vulcanite shop and the gold shop. In the latter the nibs are cut out of flat sheets of gold with a steel die and passed over to the tipping experts. Tipping or "pointing," as it is known to the trade, is the welding on of tiny pellets of osmiridium, or other "pointing" alloys to the tips of the nibs to prevent them from wearing away.

After the points have been welded, the nibs pass through various processes, being stamped with the maker's name, tempered, curved to the right shape, and polished. Finally, the nibs are slit on a whirling copper disc. This disc is exceedingly soft, but such is the revolving speed it cuts through the osmiridium. It needs a very highly specialized expert to handle this machine, for a slip of a thousandth of an inch would ruin the nib.

In the vulcanite shop long strips of hardened rubber are hollowed out with delicate lathes and converted into the barrels of the pens. After the nibs have been fitted on, the finished article is filled with ink and fastened with clamps to an "ink-slinger." This is a revolving machine which whips the pen at such a terrific speed that it dashes the ink out in streams should there be the slightest leak.

Oil In Lesser Slave Lake Area

A. P. Phillips, field manager for the International Oilis Alberta, Limited, recently stated that the result of the company's drilling last year in the Lesser Slave Lake area gave very satisfactory results, and produced a heavy gas flow and also good indications of oil. This company holds some 36,000 acres in the area and intends to start operations again early in the spring.

A recently invented electric scrubbing machine saves time and labor.

"Miss Fohl is very fond of animals!"

"Good. Then there is hope for me. Yesterday she called me an ass!" — Vikingen, Oslo.

65,000,000 Bushels of Grain Move West

1. A Canadian Pacific freight boat being loaded with grain. 2. Round for far countries carrying some of Canada's golden crop. 3. Part of a grain train passing through the mountainous regions of the west. 4. A huge double-header hauling grain near Hector, Alta.

Over 65,000,000 bushels of grain will be carried into the port of Vancouver for the twelve months ending March 31 next, according to estimated figures issued from the offices of E. D. Cotterell, Winnipeg, Man., superintendent of transportation for the western lines of the Canadian Pacific Railway.

These figures will establish a record. In fact they show enormous strides since 1922—the first year that the Canadian Pacific Railway handled any quantity of grain to the western coast.

Up to and including January 21 of the present year, a total of 22,833,573 bushels have been shipped by boat from the port of Vancouver. Of this amount 28,756,980 bushels have

been routed to the United Kingdom; 3,732,045 bushels to the Orient and 244,557 bushels to other countries.

It is interesting to note that up to January 21, the Canadian Pacific Railway loaded on western lines this season 125,481 cars of grains of all kinds. If placed end to end this vast collection of cars would stretch approximately 1,170 miles and a train, travelling at the fast rate of 60 miles an hour, would take nearly twenty hours to pass them.

Very few people know that the very extensive and expensive facilities provided by the Canadian Pacific Railway to handle the annual grain crop on western lines remain idle, comparatively speaking, for about two-thirds of the year, and the money

invested in these facilities and extra rolling stock earn no returns during the period mentioned. The building of the Transcona yards at Winnipeg, with over 100 miles of track and a capacity of 12,000 cars, one of the most up-to-date yards on the continent, was necessary to handle the Canadian Pacific's grain traffic, and is therefore used for handling revenue traffic only about two-thirds of the year.

During the time the cars and locomotives are lying idle they are inspected thoroughly by the mechanical department and put into first class shape, so that when the rush commences they are ready for immediate use. This year seventy of the company's largest engines were transferred west for the grain haulage.

Assisted passages for British Subjects

If you give us their names, your relatives and friends may obtain the low ocean rate of £2, reduced rail-road fares, and FREE transportation for children under 17, providing they are placed in farm or domestic employment.

COPYRIGHT, CANADA, 1925

CHAPTER XIX.—Continued

The Englishman stretched out his arms dramatically. His voice quivered like a violin string. "The British Empire is my country," he said; "I was born beneath the British flag, and so were my people for generations back. I love it. The British Empire is in trouble and has called. I do not reason, I go. It's like your mother calling—would you wait to question if your mother called? If you knew your mother was attacked by a bully would you hang back to see first if she had been to blame in any way—would you? My mother couldn't be wrong—not to me. That's what I mean."

Helmi was coming in from the kitchen with the dessert on her big tray. She paused, arrested by the strange voice speaking with such terrible earnestness.

Bill Larsen had not stopped eating. Empires might rise or fall, but Bill believed in getting his "vittles" while they were hot. "Well no," he said, "I can't say as I feel that way toward any country. It's a case of show me—I'm from Missouri, first, last and all the time."

Helmi watched the Englishman's face. He was staring helplessly at the complacent big giant before him, who serenely buttered a slice of bread on his broad palm as he spoke.

"I ain't so fussy over your old British Empire, anyway," added Bill; "I don't know but I'd just as soon see Germany win."

Arthur Warner, walked over to where Bill sat. His face was white and his eyes very dark. Helmi knew just what was going to happen.

"You cannot insult my country in my presence," he said quietly, and slapped the Swede's face with his open hand.

With a hoarse oath Bill sprang from the table.

Helmi screamed and darted forward, but the Swede's closed fist had already landed with smashing force on the Englishman's face, sending him reeling to the floor.

It was Helmi who was first beside him. "Oh, you big stiff, Bill Larsen," she cried, indignantly, "he only gave you a little slap, but you smash at him like a kicking horse. You're a big bum, Bill Larsen, that's all you are! Maybe you've killed this man."

A Blessing to People of Advanced Years

Gin Pills relieve sufferers from kidney and bladder trouble

"I wonder if you really know what a blessing Gin Pills are to people of advanced years."

"I am 72 years of age, and suffered for a considerable time with kidney and bladder trouble. My rest was broken through having to get up in the night three and four times. Later I suffered with pains in the bladder, and my son, who had used Gin Pills for pains in the back and lumbago, bought me a box. Before I had finished it I was relieved of the pains in my bladder and had to get up less frequently. At my age I can scarcely expect to be permanently free from troubles of this kind, but if Gin Pills will give others the relief they have given me, they will be a blessing indeed."

(Name on request.)

Prompt and lasting relief has been found in Gin Pills by thousands of people of advanced years who have had kidney or bladder trouble. If even slightly troubled in this way, get a box today at your druggist's—50c. National Drug & Chemical Company of Canada, Limited, Toronto, Canada.

Has Many Underground Rooms

250,000 in London County Have Cellings At Street Level

A recent census in one London borough alone reveals the existence of 7,000 basement rooms, of which 1,500 have cellings at street level and are death-traps, therefore, if floods come. It is estimated that there are 250,000 basement rooms in the County of London.

Of course, not all are used as sleeping apartments, but the majority are habitations for day use and are let to people who cannot yet find other homes. One can scarcely call this condition of things "shameful." It is an unwholesome legacy of the war, and borough authorities, in sheer mercy, are compelled to turn a blind eye to the law until arrears of building, particularly of workmen's dwellings, have been wiped out. They cannot turn the people into the street.

Why is Red Rose Tea so fresh and flavorful? The answer is that it is a blend of the choicest, juiciest leaves, picked when only ten days old—and sold by your grocer in clean, bright aluminum. No tea can be expected to retain its richness and strength unless packed in this modern metal container—the only package worthy of Red Rose quality.

1-W

and Old Slim are hand in glove, and no one can tell them anything. She says it's her duty to care for a soldier who is going out to die for all of us. Well, he don't need to die for me—I'm an American citizen, and I guess Old Glory will always protect me. I wonder what Jack Doran would say if he came home right now? If I know men, and I certainly should, a thing like this will take a lot of explaining. Poor Mr. McMahon would have shot any man whom he found in his house like this. He was so impulsive where I was concerned. He didn't even like to have me left alone with the ice-man. I told him it was nonsense, but nothing could change him."

But Helmi and her guest were not concerned over public opinion. Strangely enough, neither of them had thought about it. The doctor from Zannerman had set the broken arm, and advised him to lie still until the dizziness in his head had gone.

The time passed pleasantly for Helmi. She was glad to have someone to care for, and "Mr. English," as she called him, was so grateful. When he tried to pay her, Helmi firmly refused to accept anything. "You are a good man," she said, "leaving everything to go to fight for us. I am glad to help you. I wish I could do more."

It came to the last day, and Arthur Warner was sitting in the rocking-chair watching Helmi as she packed his valise. She had taken out his things, washed his shirts and socks, mended them, and pressed his clothes. "By Jove, Helmi!" he said, in admiration, "you are a born nurse, so quiet and capable. They are calling for nurses over there—can't you come along? I have lots of friends there who haven't forgotten me, I am sure, and they would get you in. You are too smart a girl to be just a waitress."

Helmi held up a little garment which she had been making, and quite frankly told him why it was impossible for her to go.

The Englishman apologized humbly.

"Oh, no," said Helmi, "it's all right; I do not mind telling you. No one here knows yet, but I am not sad about it. I am glad, I am only sad about Jack being away."

"I love what you said about your mother," said Helmi after an interval of silence. "You would fight for her even if she were wrong. No, she couldn't be wrong to you. That is a lovely thing. Do all men feel like that? I would like to have a son who would feel like that for me."

"I think all decent men do feel that way," Warner said simply.

(To Be Continued.)

Trail Riding in the Rockies

There is no place in the Canadian Rockies where trail riding is more enjoyable than in Waterton Lakes National Park, in southern Alberta. Over 150 miles of trails, broad, well-made and so safe that not even the most timid may feel alarm, are open to the visitor. Nearly a score of trips can be arranged from the town-site of Waterton Park.

Dismal Patient: "Yes, doctor, my head is like a lump of lead, my neck is as stiff as a drainpipe, my chest's like a furnace, and my muscles contract like bands of iron."

Doctor: "I'm not sure you shouldn't have gone to a hardware dealer."

ECZEMA ITCHED AND BURNED

On Arms and Legs Six Years. Cuticura Heals.

"When I was a small boy eczema broke out on my arms and legs in small pimples. As I grew older the eczema became wet and turned very red, and my clothing aggravated it. It itched and burned so that many a night I could not sleep. The trouble continued for six years."

"A friend advised Cuticura Soap and Ointment so I sent for a free sample. I found great relief after using it so purchased a cake of Cuticura Soap and a box of Cuticura Ointment which healed me." (Signed) Louis W. Plunz, 7128 Jasper Ave., Edmonton, Alta.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes. Sample Each Free by Mail. Address Canadian Agents: "The Record," Ltd., Montreal. Price, Soap 25c. Ointment 25c. and 50c. Talcum 25c. 1926. Cuticura Shaving Stick 25c.

C.P.R. Has Big Program

Will Employ Thousands Of Men and Spend Millions Of Dollars On New Work In West

Work for thousands of men in Western Canada and payrolls running into millions of dollars are indicated in the western building and expansion program of the Canadian Pacific Railway for the 1928 season. The details of the program were announced by D. C. Coleman, vice-president of western lines.

Tenders are already out for some of the work and operations will be pushed to the utmost as soon as spring opens up.

In Saskatchewan new stations will be erected at McMahon, Armley, Sylvia, Laevert, Neilburg, Crane Valley, Tuberosa, Rockglen, Coronach, Fox Valley and Carmichael.

At Queenstown and Hebbena in Alberta, new stations will be erected, the program states. A number of stations will be erected at different towns in Manitoba. The capacity of the Weston freight car shops near Winnipeg are to be doubled and the locomotive shops enlarged.

At the town of Hardisty, Wilkie and Goudie, in Saskatchewan, new coaling plants will be built and the same construction will occur at Vulcan, Alta., and at Crow's Nest, Nelson and Tadanae in British Columbia. Additional washout plants will be installed at Calgary. Red Deer terminal will be extended, additional trackage will be built at Ogden, Calgary and Winnipeg and at Vancouver new tracks will be built to serve the company's piers and also to serve the grain elevator to be constructed near the Second Narrows bridge.

A very extensive program of bridge replacements will be undertaken and approximately 250 miles of 100 pound steel will be placed in the main track west of Swift Current.

RHEUMATIC PEOPLE CAN OBTAIN RELIEF

By Enriching Their Blood With Dr. Williams' Pink Pills

Rheumatism is a disorder of the blood. It attacks people when the blood is thin and impure, thus setting up inflammation of the muscles and joints. Wet or cold weather may start the pains of rheumatism, but is not the cause. The cause is in the blood. Hot applications or rubbing with liniments may ease the pain, but do not reach the cause and the pains are soon back again. To get rid of this most painful trouble you must treat it through the blood and for this purpose nothing else can equal Dr. Williams' Pink Pills, which from first dose to last actually make new, rich blood, thus driving the rheumatic poisons from the system. Mr. Henry E. Amro, Lower East Palmdale, N.S., tells what these pills did for him. He says:—"I had an attack of acute rheumatism so bad that I could not walk a hundred yards without so much suffering that I would feel faint. I could not do the least work, and any movement caused great pain. I was under the care of a doctor but did not improve much. Then reading of a similar case in a newspaper I decided to try Dr. Williams' Pink Pills. By the time I had used three boxes, there was no doubt they were helping me. I took altogether about a dozen boxes when I was entirely relieved of the trouble, able to walk four miles to my work, chop wood all day, and then walk home again. To anyone suffering from rheumatism I can strongly recommend Dr. Williams' Pink Pills."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Heavy Livestock Shipments

Livestock handled during the year 1927 at Leithbridge at the yards was double the total of 1926. Hogs showed a 50 per cent. increase due to heavy shipments to the United States coast markets, and horses doubled in number due to shipments to Russia and a keen demand in Eastern Canada. The sheep run was exceptionally heavy.

Shipbuilding in Canada

A total of 295 ships were built in Canada during 1926, according to a report of the Department of Marine and Fisheries. These vessels had an aggregate gross tonnage of 48,395 and a net tonnage of 37,806. British Columbia led in the shipbuilding with 253 vessels to her credit.

Minnard's Liniment Kills warts.

Clerk—"You say it's not ink in this bottle? Why, certainly it's ink."

Shopper—"Well, it says right here on the label: 'made by the Blank & Blank Company. Not ink.'"

Protect the child from the ravages of worms by using Mother Graves' Worm Expeller. It is a standard remedy, and years of use have enhanced its reputation.

Pierre Charles L'Enfant, a French engineer, planned the layout of the city of Washington in 1791.

Success is merely the matter of doing the right thing at the right time.

ASPIRIN

To break a cold harmlessly and in a hurry try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Little Helps For This Week

"Be not hasty in thy spirit to be angry; for anger resteth in the bosom of fools."—Ecc. vii. 9.

As through an ill-thatched roof The pelting rains descend, So an unthinking mind The stormy passions rend; As well-thatched roofs defy the rain, So passions crash and dash against The thoughtful mind in vain.

—The Dhammapadam.

Like those who burn their houses and themselves within them, anger makes all things within full of confusion, smoke, and noise; so that the soul can neither see nor hear anything that might relieve it. Wherefore, sooner will an empty ship in a storm at sea admit of a governor from without, than a man, tossed with anger and rage, listen to the advice of another, unless he have his own reason first prepared to entertain it.—Plutarch.

Prince Owns Oyster Beds

Leases Ground In Duchy Of Cornwall To Company

I wonder how many people know that among the many varied possessions of the Prince of Wales are flourishing oyster beds in the Duchy of Cornwall. The Prince does not breed them himself, but leases 400 acres of ground at Port Navas to a company and allows them to be bred in the River Fal and afterwards transferred to a stretch of "sweet" water at Helford. Although he is not a great oyster-eater, himself, H.R.H. takes such an interest in an industry which gives employment to many of his Duchy tenants that I hear he has converted the King not only to having a regular weekly supply sent to Buckingham Palace, but to having no others on the royal table.

Another Aid To Aviation

Radio Signals Guide Pilots Through Fog and Storm

One more obstacle to safe aviation—fog—is about to be overcome through experiment, says Col. Paul Henderson.

"Since radio engineers have found that radio waves can be directed through ether," Col. Henderson said, "experts have evolved a system of guiding pilots through fog and storms by means of radio signals."

"In a recent experiment one airman had been guided through an intense fog from a New York field to one in Western Pennsylvania."

In order to demonstrate the advantage of using clean seed special seed-cleaning machinery is to be taken through the province of Nova Scotia by the provincial Department of Natural Resources for the purpose of enabling farmers to clean their seed.

Jules Verne was born a hundred years ago, and the extravagant fancies that made him a popular writer of fiction have become the sober commonplace of our everyday life.

On fishing trips take Minard's.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste, it's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep. Just one warning: it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

LEE'S COLUM

Dear Folks—

No, I haven't purchased The Recorder, but from the front page one would think I had—but listen, "The Winning of Barbara Worth" is real entertainment. Come and see it tonight, and remember I am having two shows Saturday commencing at 7 p. m. And send the kiddies out Saturday afternoon at 3 p. m.

Imagine over two million, eight hundred thousand copies of one book being printed and sold. This was done with Harold Bell Wright's "The Winning of Barbara Worth" which I am screening tonight and tomorrow night. And what a cast—Ronald Colman, Vilma Banky and Gary Cooper with a supporting cast of favorites. Don't miss seeing it, because it is really good entertainment. It is almost a perfect picture.

We got it! "BEN HUR", the most outstanding picture ever flashed upon the silver sheet. The rental I pay for this superb picture is enough to—well it is surely plenty. Exact dates will be broadcasted later, and when we say broadcast we don't mean maybe, because every person within 20 miles of Raymond will hear of it. We expect to play it for one solid week. That's the kind of an attraction it is.

I appreciate very much what the editor of this paper printed in last week's issue regarding the excellent attractions I've been playing—thanks Pete. I would like to add that it is my sincere belief that I am playing a consistently better class of pictures than any exhibitor in the country. At least that is my aim and endeavor.

I received so many favorable reports on "The Way of All Flesh" that I anticipated exceptional business. The first night was capacity but the latter two nights were flops and the prices I charged for this picture were lower than any place it was shown, even Salt Lake. Suffice to say I lost money, but such is the way of all flesh.

In an endeavor to co-operate with home dramatic attractions the Rex Theatre will be closed next Tuesday March 13, on which date the second ward M Men will show "A Bachelor's Honeymoon", at the Opera House.

L'Envoi—No I don't NO what it means, but some poets use it in their plants and poems but gosh! I am to the end of my column and that means something, or shall I continue?

Famous last words—"This is pre-war stuff, boys."

—Lee Brewerton

Local grade nine students kept up their winning streak last week when, at Cardston, they beat Cardston grade nine basketballers 50—22.

Seed Wheat

Look to your seed wheat requirements. I can supply you with 3rd. generation registered Marquis Wheat, reg. Certificate No. E15852 germination test No. 67.640 testing 96 percent germination, at \$1.50 per bu. cleaned; order it now.

For High Beet Yields

CROP ROTATION

An orderly succession or sequence in which different crops follow each other according to a definite plan, flexible if necessary.

The best order is a sod or leguminous crop, followed by one or two row crops, followed by small grain.

This change of crops improves yields. Each succeeding crop in a proper rotation feeds at a different soil level, uses elements of fertility not exhausted by the previous crop and leaves substances in the soil helpful rather than injurious to the following crop.

MANURING

The use of barnyard manure, legumes, green growth and crop residues plowed under provide most of the organic matter or humus for soil building.

Each crop removes from the soil some of its fertility.

Like a bank account, soil is depleted if deposits of fertility are not made in it.

In general, crop rotation without manure has been found to be almost as effective in increasing yield as the use of fertilizer without rotation.

The highest yields are possible when manure and rotation are conjoined or practiced together.

1. Proper handling of soil and water. 2. Manuring. 3. Rotation, about one-third each in importance, constitute the vital factors in crop production.

THE FUNCTION OF FERTILIZERS

1. Chiefly to furnish nitrogen, phosphoric acid and potash, which may be termed the essential manurial elements. These three are removed in crops in greater amount than other elements of fertility.

2. A secondary function of manures, particularly yard manure and green growth turned under, is seen in two directions.

A. The vegetable matter improves the physical character of

the soil.

B. The addition of vegetable matter to soils improve its water-holding powers. Both these secondary functions of manure increase the availability or effectiveness of the essential fertile elements.

Moreover, farmyard manures actually contain the bacteria so necessary for soil improvement. Green manures, as in the case of yard fertilizer, make the soil a more favorable medium for the growth and development of these bacteria.

It is a part of the modern farmer's education to understand the handling of soils so as to favor the development of the bacteria which bring about the decay of organic matter in the soil, and which make the elements of fertility available to the plants.

This soil you are tilling is alive. It may be compared to your own body, as having circulatory, digestive, and respiratory systems.

Fertilizers feed it. Plowing exercises it. Cultivation induces proper breathing. Water and air aid its digestion and circulation. It may be poisoned or starved in the same sense that the human body may be improperly fed and poorly nourished.

MAINTAIN THE QUALITY OF ALBERTA'S CROPS—

Better Seed means Better Yields, Better Grades, Better Prices.

A special committee appointed by the Minister of Agriculture, with the co-operation of numerous organizations in the province is urging the use this spring by farmers throughout the province of High Quality Clean, Treated Seed Grain, in order to reduce the heavy annual losses sustained by sowing inferior seed.

Farmers can co-operate by

1. Using registered seed wherever available.
2. Using at least high quality commercial seed.
3. Having seed tested for germination and purity.
4. Testing seed for smut.
5. Thoroughly cleaning all grain intended for seed.
6. Seeding only varieties of recognized quality and varieties suitable to the district.

Good seed will be in demand this spring. Secure your requirements early—before the supply is exhausted.

U. F. A. Locals, Boards of Trade, the Wheat Pool, Banks, Commercial Grain Firms, the Press and many other organizations are working in co-operation with a

BETTER SEED COMMITTEE

consisting of representatives of the Provincial Department of Agriculture, the Dominion Seed Branch, the Canadian Seed Growers' Association, the Alberta Seed Growers' Association, the C. P. R. Agricultural Department and the University of Alberta, D. A. McCannel, Provincial Publicity Commissioner, Edmonton.
